Garbage Dream Agency

232 N Main St,
Pomona, CA 9176

Garbage Dream hiring department,

I have become aware of the importance of working in a position where you find value and interest within the company's culture and purpose. After working in the freelancing world, it has become clear of the importance and trust that businesses put into digital marketing agencies. I can see how Garbage Dream clearly serves the purpose that businesses look into when looking for the necessary tools to launch their business.

What stood out to me the most is how the company is not just a generic digital agency but one that aims at everything automotive related. The automotive industry is something that I seem to gravitate towards, specifically in the F1 and Off-road spectrum.

Having spent the past 3 years learning about web development, I have not only developed robust problem-solving skills, but also a flair for project management.

In my latest role as a freelance developer, I was involved in the full life-cycle of 7 websites from design to development phases. Within these projects I highly exercised my design skills specifically using Figma as a tool. Along with the development skills acquired through the projects I also exercised my front-end development skills with Wordpress. My programming skills in Python,HTML,CSS and Javascript from college along with my acquired design skills would make me an asset to Garbage Dreams web development department.

Thank you for your time and consideration. I can be easily reached at your convenience by email (nicolas.ojeda71@gmail.com) or by telephone (626 804-1638).

Sincerely,

Nicolas Ojeda
